OUR OFFER

Specialist architectural, engineering, design and project management services helping you to achieve your decarbonisation goals.

- 7 Steps of Decarbonisation
- How we Work
- Sewerby Methodist Church

STEP 1

Identify all the systems that use energy within your church

Brough Methodist Church

Patrington Methodist Church

STEP 2

Calculate your annual costs, consumption and associated carbon footprint

STEP 3

Identify all
areas where
energy is
wasted

Howden Methodist Church

STEP

4

Determine appropriate energy saving measures to reduce energy demand

Withernsea Methodist Church

STEP 5

Consider alternative forms of low carbon heating to reduce carbon emissions

Northallerton Methodist Church

Hedon Methodist Church

STEP **6**
Consider ways
to generate your
own renewable
electricity and
store it

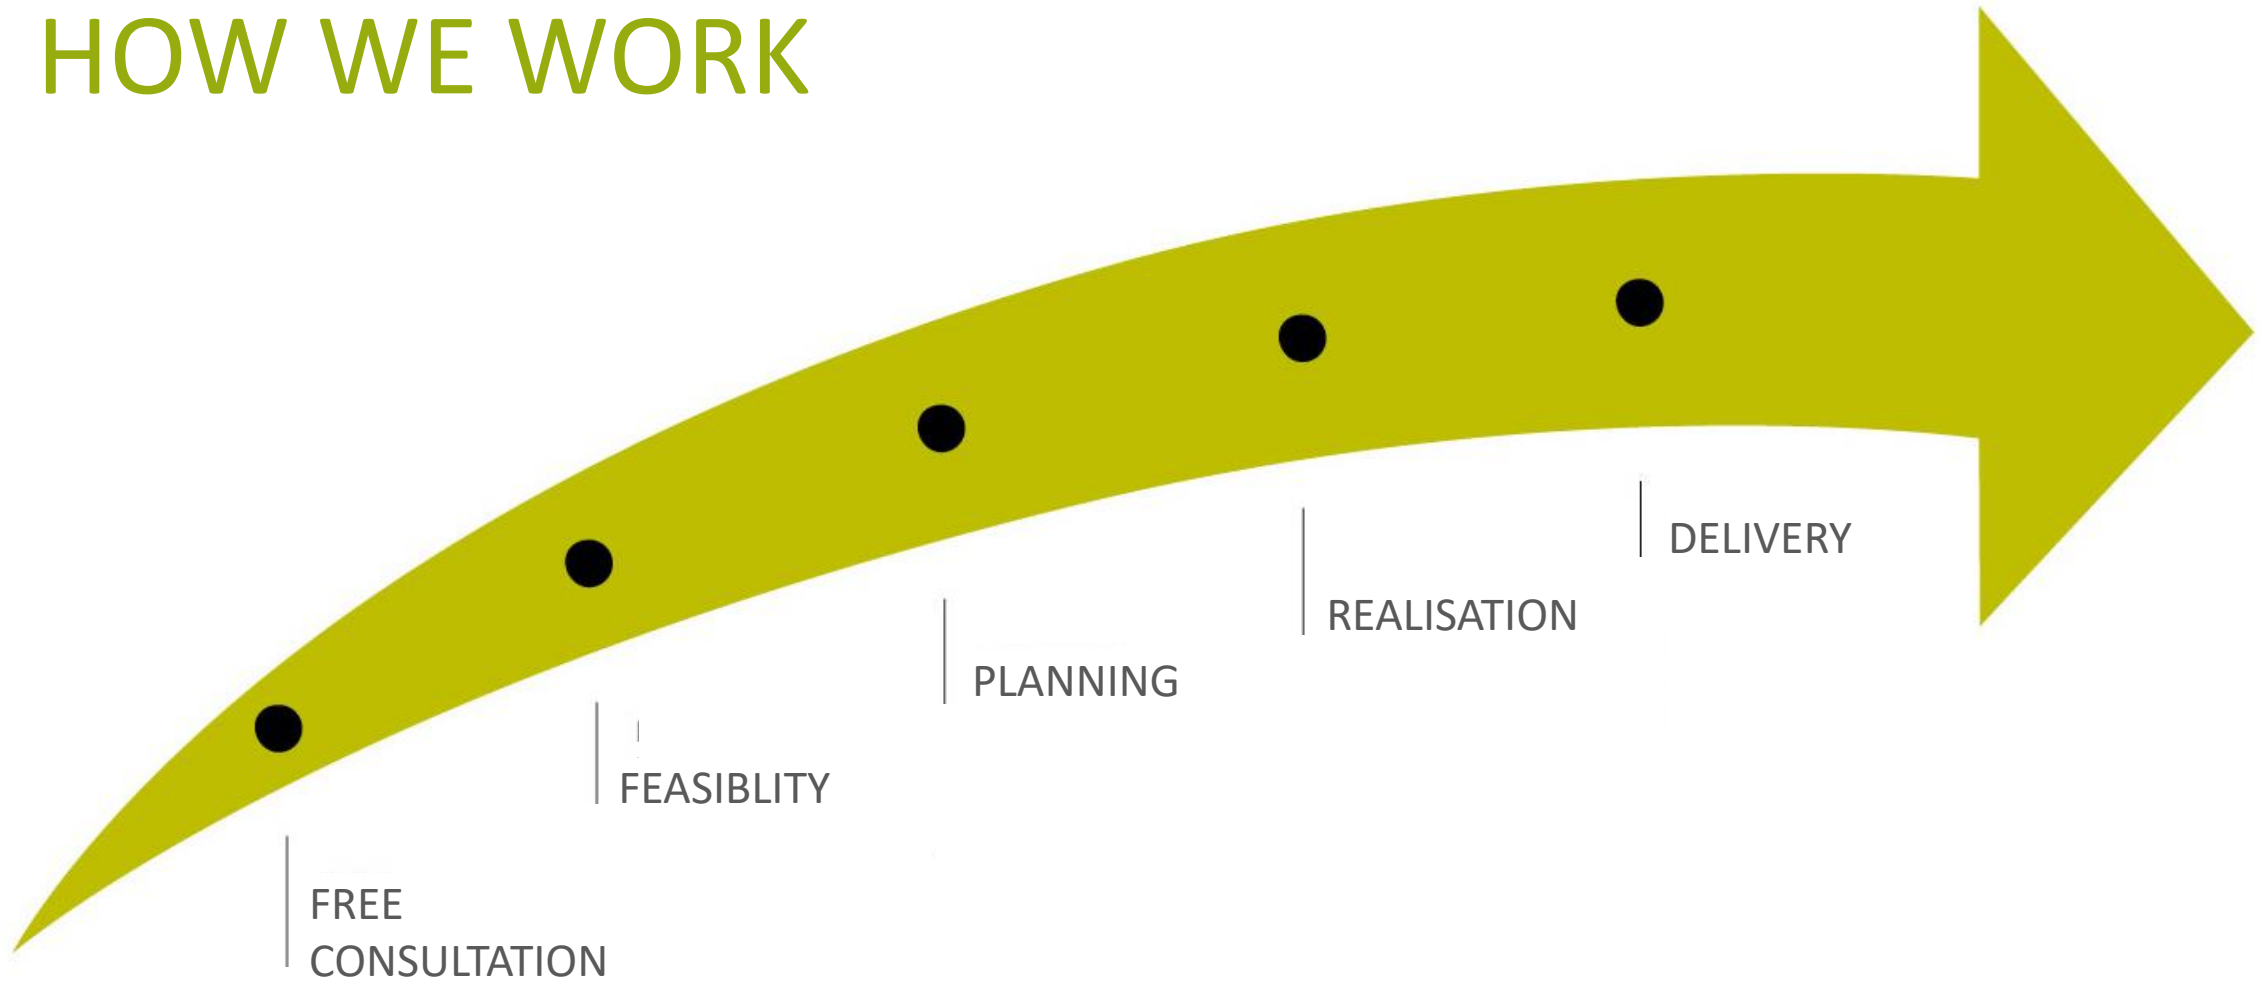

STEP 7

Calculate the estimated capital costs, plus future energy use with costs and carbon footprint

Walkington Methodist Church

HOW WE WORK

A photograph of a single-story brick church building with a red-tiled roof. The entire structure is surrounded by silver metal scaffolding, indicating it is undergoing renovation or repair. The church has several white-framed windows and a white entrance door. A small cross is visible on the roofline. The building is situated on a green lawn, and other residential houses are visible in the background under a cloudy sky.
